

As the sun starts to shine down on the [homes in Boise, ID](#), the arrival of spring seems to naturally inspire us to redecorate with a fresh new look to match the fresh new season.

We'd like to share some of the trends you can expect to see in homes around Boise this spring. Which ones will you try in your home?

Switch Up Your Color Palette with Warm Earth Tones

Cold grays are no longer dominating the décor scene. People are turning toward a warmer, more natural palette with soft greens, browns, and creamy whites. These shades can make your home feel like a cozy retreat. Sherwin Williams offers a wide range of warm neutral colors that are popular choices for home decor. Among these favorites are Accessible Beige (SW 7036), a versatile beige with subtle undertones perfect for creating a warm and inviting atmosphere; Agreeable Gray (SW 7029), a warm gray with a hint of beige, ideal for those who prefer a more modern and neutral palette; and Alpaca (SW 7022), a soft and soothing greige (gray-beige) that adds warmth without overpowering a space. These warm neutral colors provide a beautiful foundation for a variety of decorating styles and can help create a welcoming and harmonious environment in your home. Which one resonates with your design vision?

Bring a Touch of Nature Indoors with Trending Houseplants

Spring in Boise: we start to see the snow gradually melting away, revealing the earth underneath. And oh, the sight of those first flowers poking through the soil is just the best! Bring the outdoors in with an abundance of plants! Current trends in houseplants focus on large varieties like monstera, fiddle leaf fig trees, and birds of paradise. If you don't have a green thumb or have limited natural light, go with the theme and introduce botanical prints and fabric for that pop of natural elements.

Add a Unique Focal Point with Mural Wallpaper

Murals are a high-impact way to bring images of nature into your home. The most popular styles of mural wallpaper this spring draw from the dark academia trends, depicting natural and historical scenes in a painterly, artistic way. They can add a fun or dramatic element of fantasy to your interiors. Try this trend in a study or home office. Channeling classic literature like the works of authors like Edgar Allan Poe, Fyodor Dostoevsky, and Oscar Wilde for a vintage timeless academic esthetic.

Embrace Sustainability in Design

Using eco-conscious materials can take your interiors from reflecting nature to genuinely helping it. This can mean using LED bulbs to reduce electricity use, purchasing thrifted furniture and repurposing or upcycling items you already have. Consider quality over quantity, a trend involves buying fewer but better items such as furniture and décor. Thrifting the items can help you afford high-end brands that would be out of reach if purchased new. These products are generally made better and will last longer than cheaper versions.
